

Sergei Dorofeev

.Net / Java Full Stack Developer

Profile

Since 2012, I have been working as a software developer. My focus is on full-stack development of web applications using .NET and Java technologies.

Throughout my career, I have worked both as a software developer and as a team lead. In this role, I have gained experience working in development teams of various sizes – from small teams with three members to large teams with more than 50 developers, working in both English- and German-speaking environments.

Employment History

Software developer at ITU consult GmbH, Lehre

March 2025 – Present

Project: Crypto

Amount of crypto operations related to automotive manufacturing.

Benefits of my work: Implementation of crypto operations.

Technologies: Java, Spring Boot, MySql, Microservices.

Projekt: NewYorker – Management Dashboard

Implementation of analytical dashboards for sales managers.

Benefits of my work:

The application was planned and implemented entirely from scratch – within a limited timeframe and with a high level of quality.

Technologies: .net 10, Angular 21, Ms Sql, EF Core.

Software developer at billwerk GmbH, Frankfurt

Mai 2022 – February 2025

My tasks as a software developer are:

- implementation of new features for the billwerk solution.

Projekt: Billwerk

Subscription management for the B2B.

Benefits of my work: I designed and was a member of a team that implemented an integration using EBICS (Electronic Banking Internet Communication Standard) for direct communication between the billwerk solution and a client's bank.

Technologies: .net 6, mongodb, angularJS, Angular, java, microservices

Software developer at m:con - mannheim:congress GmbH, Mannheim

January 2021 – April 2022

My tasks as a software developer are:

- re-implement old applications based on modern technologies;
- support legacy applications.

Projekt: Comcon

This project is a middleware application between external and internal systems.

TypeScript, jQuery, Bootstrap

Windows Forms

WPF

Angular

Entity Framework

Java

Spring Boot

MongoDB

Languages

Russian

English

German

Hobbies

Journeys, reading, self education, foreign languages.

The application performs multiple requests to internal systems and generates a structured response for external requesters.

Achievements: Planned and implemented the application from scratch, including analysis of the legacy version's logic, through to the final release.

Technologies: .net core, entity framework, ms SQL, angular 10, angular material, bootstrap, Azure repositories, Azure pipeline.

.net / java developer at COMbridge IT Consulting, Wolfsburg

June 2018 — December 2020

As .net developer, I took part in web and desktop projects.

Projekt: Abp-Tool Project

This was a desktop application project. The main purpose was to verify whether the predefined configuration of a scheme matched the actual electrical scheme.

Achievements: Interviewed candidates to build a development team, planned the work, communicated with the customer, and contributed to the implementation.

Technologies: .net, windows forms, wpf, ms sql, dev express, BitBucket.

Projekt: K-CMS

This was a desktop application project based on Swing and DB2. The project followed a Rich Client architecture and had been in operation for approximately 25 years.

Achievements: Introduced TDD as part of the development process, as well as retrospectives and knowledge transfer sessions.

Technologies: Swing, DB2, Eclipse

Web developer at RusWizards / Distillery, Taganrog

August 2012 — June 2018

As a software developer, I implemented several minor projects. Also, I took part in an enterprise project Syncplicity for almost 5 years.

Projekt: Syncplicity

It was a system for data synchronization.

My responsibilities were Front-end, Back-end, Web-Services, and a database.

During this project, I got a lot of experience. For example, how the development process and communication should be organized, or how the code quality should be increased, and many others.

Benefits of my work: I implemented the globalization and localization of the web application, as well as a new Chrome Extension.

Technologies: asp.net, ado.net, MS SQL, bootstrap, jQuery, knockout.js, Git, Visual Studio

Software developer at Aviaok International / DC Bars T / IK BarsT, Taganrog

March 2006 — August 2012

Tasks:

- Software development in C, C++, VB.
- Implementation of testing software for the avionic in accordance with the DO-178B.

Engineer, degree certificate with distinction, Taganrog State Radio Engineering University, Taganrog

September 2001 — June 2006

I studied informatics and information security for 5 years. As a result, I got a diploma with the grade of merit.

Personal achievements

Certification - Azure solution developer

May 2019 — December 2019

During my free time, I learned Azure Technologies and confirmed them with a corresponded certificate.

Certification - MCPD

January 2013 — February 2014

At the beginning of my software career, I took several exams on .net technologies and as a result, I got a Microsoft Certified Professional Developer certificate.
